Bengaluru, Karnataka 560073

SUMMARY

Aspiring Software Development Engineer with a strong foundation in Data Structures, Algorithms, and core Computer Science concepts. Hands-on experience building production-grade, full-stack applications and RESTful APIs using Java, Spring Boot, Microservices, JavaScript, ReactJS. Proven ability delivering backend services, database-driven features, and secure authentication systems in live industry projects. Passionate about writing clean, maintainable, scalable code and contributing to high-impact engineering teams.

TECHNICAL SKILLS

Languages: C, Python, Java, JavaScript

Backend: Spring Boot, Microservices Architecture, REST APIs, Feign Client, Flask

Frontend: React.js, JavaScript, HTML, CSS

Databases: MySQL, MongoDB, Flyway Database Migration

Core CS: Data Structures and Algorithms (DSA), Operating Systems (OS), Object Oriented Programming (OOP), Database Management Systems (DBMS), Computer Networks (CN)

Tools/Platforms: Git, GitHub, Firebase, Google Cloud, JWT, Linux, Postman

Concepts: Authentication & Security, API Design, System Reliability, CRUD Operations.

EXPERIENCE

Software Engineer Intern – Full Stack (Java, Spring Boot)

Jan 2026 – Jul 2026

Skyllx Technologies Pvt. Ltd.

Onsite – Bengaluru, Karnataka

- Contributed to **Rainbow ERP** (School/College Management System) by developing the Certificate Service module end-to-end using Java, Spring Boot, and Microservices architecture, covering both frontend and backend implementation.
- Built and consumed RESTful APIs using Feign Client for inter-service communication, and managed schema versioning with Flyway migrations on MySQL for safe, incremental deployments.
- Contributed to **Skyllx's Learning Management System (LMS)**, developing scalable backend services, REST APIs, and core learning-management workflows for a production-grade platform.
- Built and integrated frontend features using ReactJS and NextJS for both student-facing and admin-facing modules of the LMS, collaborating cross-functionally on real-time development tasks within a live, production codebase.

PROJECTS

Mobile Wallet with Multi-Currency Support

React.js, Node.js, Express.js, MongoDB, JWT, CurrencyLayer API

- Designed and built a scalable backend service supporting multi-currency transactions including deposits, withdrawals, transfers, and balance management, with real-time exchange-rate API integration for accurate currency conversion.
- Implemented secure authentication and authorization using JWT, bcrypt password hashing, and HTTPS-based API communication.
- Focused on system reliability and data consistency by validating transactions, handling failures, and ensuring safe state transitions.

MouCodeBrain – AI-Powered Codebase Intelligence Platform

React 18, Spring Boot 3, Python, FastAPI, LangChain, FAISS, Docker

- Built a full-stack, microservices-based platform enabling developers to query an entire codebase in natural language, combining LLMs with vector search for context-aware, retrieval-augmented answers.
- Developed an AI engine (Python, FastAPI, LangChain, FAISS vector database) powering semantic code search and automated detection of bugs, code smells, and security vulnerabilities (OWASP/Snyk patterns).
- Built secure backend APIs with Spring Boot 3, Spring Security, and JWT authentication, and an interactive architecture-visualization dashboard (React 18, Tailwind CSS, React Flow) with real-time repository health insights; containerized the full stack using Docker and Docker Compose.

EDUCATION

Bachelor of Engineering in Computer Science

Nov 2022 – Jul 2026

Sri Krishna Institute of Technology, Bengaluru, Karnataka

CGPA: 7.83 / 10

CERTIFICATIONS & ACHIEVEMENTS

- Certificates: Big Data Analytics (NPTEL 2025), Fundamentals of Cryptography (Infosys Springboard 2025), DSA in Java (GreatLearning 2024), Cyber Security (Ethicalbyte 2024)
- Solved 80+ DSA problems on LeetCode and HackerRank; Hackathons: CTRL+Move 2025, Solana Hacker House 2024
- Volunteered at India Blockchain Week (IBW) 2025; Industry Exposure: Microsoft AI Tour, Google I/O Connect, AWS Summit & AI Conclave
